Biodynamic Wine

Did You Know?

Biodynamic soils have been tested against non-organic soils and they showed greater disease suppression, a decrease in compaction and added organic material. Converting from a conventional vineyard to an organic one is a three-year process that involves regular inspection. Organizations such as the Soil Association in the UK and Ecocert in France award the certification.

   Biodynamic Wine

Did You Know?

The concept of Biodynamics started in the 1920's with an Austrian philosopher named Rudolph Steiner. It is a holistic, homeopathic manner of farming that, of course, also includes viticulture. It is the oldest, anti-chemical agricultural movement that predates the creation of organic farming by about twenty years.

Biodynamic Wine

Did You Know?

Biodynamic Wines do not taste any different. Although a few biodynamic producers make a different style of wine that focuses more on the 'Secondary Flavors' (ie yeast flavors).

However, you might be surprised to recognize a few of these famous wine producers who make Biodynamic Wines and they do not taste any differently than what you might already be used to:

- Cristal Champagne by Louis Roederer Champagne, France
- Domaine Zind-Humbrecht Aromatic white wines from Alsace, France

TIP: There are just over 620 biodynamic wine producers in the world, such as:

- Nicolas Joly - Loire Valley, France
- Dominique Lafon - Burgundy, France
- Sepp Moser - Kremstal, Austria
- Bonny Doon - Santa Cruz County, California
- Chateau Beaucastel - Chateauneuf du Pape, France
- Tenuta e Lageder by Alois Lageder - Trentino-Alto Adige, Italy
- Weingut Wittmann - Rheinhessen, Germany
